

# Operations - Health & Safety Standards

We are operating under our already strict food safety guidelines, as well as additional practice standards of Health & Safety to ensure the safety and security of our students and trainers. Outlined below are our operational safety standards, which have been modified to specifically address COVID-19 public safety protocols.

## REQUIREMENTS:

- All trainers and students will practice social distancing to ensure their safety and security.
- All trainers and employees will apply disinfectant for hands as necessary upon entering our kitchens.
- All trainers and students will wash their hands with warm soapy water for 20-seconds before or immediately upon entering the kitchen and before beginning work.
- All trainers and students will wear gloves and masks as appropriate during work that involves handling and exchange of materials. Gloves and masks/face shields provided by trainDAVINCI.
- All trainers and students will sanitize work surfaces, stations, cutting boards and tools with QUAT- Ammonium disinfectant before beginning.
- All trainers and students will wear gloves during production work and change them regularly when handling raw foods or ready to eat foods.
- All trainers and students will wash and sanitize their hands, stations, surfaces and tools between each task to ensure HACCP standards.
- All trainers and students will clean and sanitize all kitchen production work areas, stations, tools and equipment used before leaving each day.
- We will open and close our training facility every day via our HACCP plan by sanitizing and disinfecting all workstations, work surfaces and equipment to ensure cleanliness and sanitation.
- We follow CDC COVID-19 compliance as directed and as applicable to our business.
- We have floor stand hand sanitizing stations located in the facility for students and trainers to use when passing by a unit.
- We are not allowing visitors in our training centers.
- We professionally disinfect the entire facility (classrooms, culinary lab, kitchen, restrooms, and lounge areas) with a nebulizer fogger to ensure the entire facility's cleanliness and safety as needed.
- All students will receive a COVID-19 Prevention Safety Kit upon arrival. This kit includes individually packaged gloves, mask, individual alcohol hand sanitizer and hand moisturizer, FiteBac, small plastic trash bag, face wipes, and sanitizing wipes to be used at your hotel (remote, phone, door knobs, etc.)

Please contact a DaVinci Inflight Training Institute representative if you have any questions.

Thank you.
